

MIMOS Malaysian Psychometric Assessment System (Mi-MPAS)

Psychometric assessments are a standard and scientific method used to measure individual's mental capabilities and behavioral style. These assessments' applications span a wide range of industries and can include employment suitability, company-candidate fit and more. To enhance accessibility and use of these, MIMOS Mi-MPAS offers a web-based psychometric assessment system that caters to various key industries in Malaysia.

Overview

MIMOS Mi-MPAS is a web-based psychometric assessment system that offers a wide range of psychometrics-related services from test development to test delivery for use in education, government and various industries in Malaysia. This accessible platform is capable of meeting a wide range of clients' needs for group or individual assessments. Besides being available in English and Bahasa Malaysia, Mi-MPAS also caters to experienced practitioners who wish to construct and customise their own assessment programmes.

Features

Mi-MPAS comprises the following features:

■ Online Assessments

Mi-MPAS allows individual or group assessments to be taken online in a controlled environment or anywhere else at ease.

■ Intuitive Navigation and Pre-Packaged Assessments

The Mi-MPAS user interface is specifically designed for maximum ease of use along with a variety of pre-packaged psychological and educational assessment tools to choose from.

■ Diverse and Dynamic Assessment Features

Automated test development and effective test administration allows test developers and item writers to manage and assemble tests in a shorter time for fast deployment and effective administration of test anywhere and at anytime.

■ Instant Reporting

Automated scoring for items with multiple choice and Likert scale provides flexibility of reporting and instant reports.

Technology Benefits

The main impacts of Mi-MPAS are:

■ Talent Development for Government Employees

Government agencies and organisations can use Mi-MPAS assessments for personnel selection and professional development, which includes assessing person-job fit and predicting work performance.

■ Healthcare Decision Making

Mi-MPAS provides assessments for personnel selection, medical leadership, medical practitioners' work ethics profiling and pre- and post-clinical skills evaluation.

■ Effective Teaching and Learning

Educators can use Mi-MPAS to select students for placement and admission, predict academic performance and expedite student progress by offering tailored assessments. Other available assessments can be used to assess educators' leadership, instructional competencies and other key characteristics to ensure effective teaching and learning.

Technology Summary

Mi-MPAS

A web-based psychometric assessment system that offers a wide range of psychometrics-related services in Malaysia.

Industries: Enterprise, Government, Education, Agriculture, Healthcare, Security, Finance, Market Research

Features

Mi-MPAS offers the following features:

- Online assessments
- Intuitive navigation and pre-packaged assessments
