

MIMOS Career Interest Inventory (Mi-PBT CII)

Interest is a strong motivation which drives actions. When making monumental decisions, be it a study field for college or a career path, it is invaluable to consider what makes you tick. Mi-PBT CII or CII is offered under Mi-PBT paper-based test series. It is developed based on a comprehensive scientific research to aid one in understanding oneself.

Overview

Studies have shown that people engaged in activities that genuinely interest them will be happier and more satisfied than their counterparts. With this in mind, the Career Interest Inventory (CII) was developed to assess an individual's level of interest in a wide variety of work-related activities from 7 different interest clusters: Practical, Analytic, Creative, Service, Influential, Clerical and Religious.

Organisations involved in educational studies or providing career guidance can employ CII to help students identify their areas of interest and match that with possible study courses for universities. Working adults considering a career change can also benefit from CII to discover their true passion and to gain recommendations on suitable lines of work they should likely follow.

CII does not assess an individual's knowledge, skills or abilities. Instead, information from CII is used to support tools that measure such attributes to better equip the decision making process regarding future studies or career.

Features

Career Interest Inventory (CII) comprises the following features:

- **Time-Efficient**
Instead of exploring possible interests by trial and error, CII is designed to be completed in a short time so you can get a glimpse of your true interests faster.
- **University Major and Career Recommendation**
Benchmarked across major fields of studies and occupations, a list of academic majors and job titles will be suggested and specifically tailored to your interest profiles.
- **Easy to Comprehend**
CII contains a list of activities that are easily understood by students and working adults aged 16 and above.
- **Available in English and Bahasa Malaysia**
CII is available in both English and Bahasa Malaysia versions.

Technology Summary

Mi-PBT CII

An inventory built on extensive research to measure career interest and to provide feedbacks and recommendations based on the individual interest profiles.

Industries: Education, Enterprise

Features

- Time-efficient
- University major and career recommendation
- Easy to comprehend
- Available in English and Bahasa Malaysia
- Provides profiling reports
