

MIMOS Junior Career Interest Inventory (Mi-PBT JCII)

Career exploration begins in adolescent years. Studies have shown that adolescents tend to be more interested in careers which they believe they can perform well. Mi-PBT JCII or JCII is a psychometric assessment offered under the Mi-PBT paper-based test series. JCII is specifically designed to assess an adolescent's (between the ages of 15 and 18) level of interest in work-related common activities and aid their career exploration by leading them to more realistic, interest-based potential career choices.

Overview

Junior Career Interest Inventory (JCII) is a non-cognitive test designed to assess an adolescent's (between the ages of 15 and 18) interest based on common activities which relate to certain types of jobs, leading to more realistic, interest-based potential career choices.

JCII assesses the degree of interest in a wide variety of work-related activities categorised in seven interest clusters:

- Practical
- Analytic
- Creative
- Service
- Influential
- Clerical
- Religious

With JCII, schools can help adolescents identify their interests and match them to potential study courses. Information from JCII can be used as a support tool to the decision-making process for future studies or career choices.

Features

Junior Career Interest Inventory (JCII) comprises the following features:

- **Comprehensive Career Exploration Made Easier**
Instead of exploring possible interests by trial and error, JCII is designed to be completed in a short time so that adolescents can get a glimpse of their potential career interests that will lead to more realistic career choices.
- **Easy to Comprehend**
JCII contains a list of common activities that are easily understood by adolescents between the ages of 15 and 18.
- **Available in English and Bahasa Malaysia**
JCII is available in both English and Bahasa Malaysia versions.

Technology Summary

Mi-PBT JCII

An inventory specifically designed for adolescents between the ages of 15 and 18 based on theories and extensive research to measure career interest.

Industries: Education

Features

- Comprehensive career exploration made easier
- Easy to comprehend
- Available in English and Bahasa Malaysia
- Provides profiling reports
- Multiple administrative media

Advantages

- Better guidance for career exploration
- Put individual talent to best possible use
- Aid counselling, and career guidance and planning

Technology Benefits

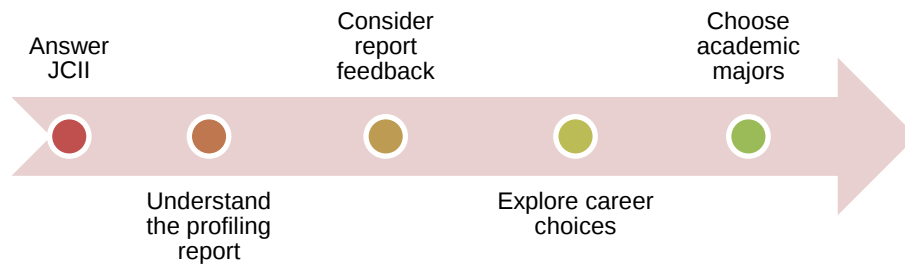

- Designed and validated in Malaysia
- Comprehensive interest assessment

Provides Profiling Reports

The JCII profiling report provides scores of an adolescent's degree of interest based on common activities from broad fields of endeavour. This information provides a better understanding of an adolescent's career interests.

Multiple Administrative Media

JCII can be taken in either a paper-based or a computer-based version. Each test taker may choose the medium which they are more comfortable with to complete the questionnaire.

MIMOS Junior Career Interest Inventory usage

Advantages

Adolescents and stakeholders can utilise JCII to better understand their deep-seated interests and to aid in career or academic exploration.

JCII can be used to achieve:

- **Better Guidance for Career Exploration**

JCII provides score interpretation report of the individual's interest profile based on the seven interest clusters with additional information on potential related jobs, leading to exploration of more realistic, interest-based career choices.

- **Put Individual Talent to Best Possible Use**

The recommendations provided matches the adolescent's interest and talent for higher motivation towards better academic performance.

- **Aid Counselling, and Career Guidance and Planning**

School psychologists and counsellors can help adolescents in their exploration of academic majors and career choices most likely to suit them as suggested in their JCII interest profile report.
