

MIMOS Medical Students Personality Index (Mi-PBT MSPI)

The Medical Students Personality Index (Mi-PBT MSPI or MSPI) is a psychometric assessment offered under the Mi-PBT paper-based test series. MSPI is specifically designed to assess personal attributes of potential medical students for predictions of their academic and career success..

Overview

The Medical Students Personality Index (MSPI) is a non-cognitive test designed to assess personal attributes of medical students and to predict their potential for success in studies and future career.

MSPI will help determine if your students:

- Are able to communicate in a clear and discreet manner
- Can provide trust and demonstrate respect to patients
- Can be trusted to keep patient information confidential
- Are accountable for any breaches of confidentiality
- Can commit to working long hours
- Are visionary and influential
- Are cooperative and work effectively in multi-professional healthcare teams
- Can judge situations wisely and make decisions that lead to positive outcomes
- Can continuously improve their medical knowledge and competence

Features

Medical Students Personality Index (MSPI) comprises the following features:

- **Measures 11 Aspects of Personality that Underpin Success in Medical Field**
MSPI measures 11 aspects of personality that contributes to an individual's success in both academic and career settings in medical field.
- **Available in English and Bahasa Malaysia**
MSPI is suitable for adults, and is available in English and Bahasa Malaysia versions.
- **Contains Valid and Non-Intrusive Questions**
Every question goes through a thorough process of review by experts to ensure that the test is both fair and relevant.

Technology Summary

Mi-PBT MSPI

A test to assess personal attributes of medical students and to predict their potential for success in studies and future career.

Industries: Education, Healthcare

Features

- Measures 11 aspects of personality that underpin success in medical field
- Available in English and Bahasa Malaysia
- Contains valid and non-intrusive questions
- Provides profiling reports
- Multiple administrative media

Advantages

- Medical leadership assessment
- Medical school application and evaluation

Technology Benefits

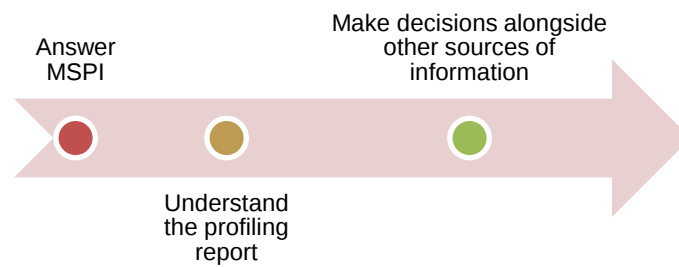

- Designed and validated in Malaysia
- Comprehensive medical students personality assessment

Provides Profiling Reports

The MSPI profiling report provides scores for the 11 aspects of personality associated with success in medical field, together with interpretations of the scores. This information provides important insights into the individual's strengths and weaknesses, and forms the basis for predictions of academic success and medical profession.

Multiple Administrative Media

MSPI can be taken in either a paper-based or a computer-based version. Each test taker may choose the medium which they are more comfortable with to complete the questionnaire.

MIMOS Medical Students Personality Index usage

Advantages

Organisations can use MSPI to make informed decisions with regards to:

- **Medical Leadership Assessment**

MSPI can be used to assess personal attributes required to develop students' medical leadership, and to plan courses and programmes accordingly.

- **Medical School Application and Evaluation**

University stakeholders can employ MSPI as an aid tool for medical school admissions, and evaluations throughout pre-clinical and post-clinical years.
