# QUICK INSTALLATION GUIDE

IT

SALIHIN IT SOLUTION SDN BHD

1/1/2015

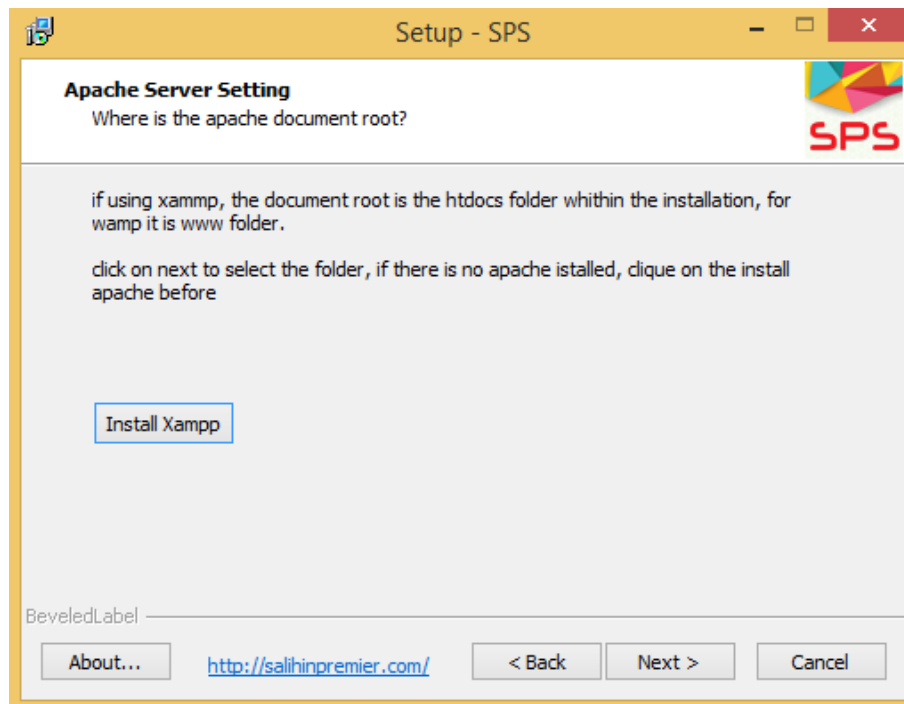

**NOTE:**

SETUP WILL AUTORUN IMMEDIATELY AFTER YOU INSERT THE SPS USB INSTALLER DRIVE. OTHERWISE YOU CAN CLICK THE SETUP.EXE

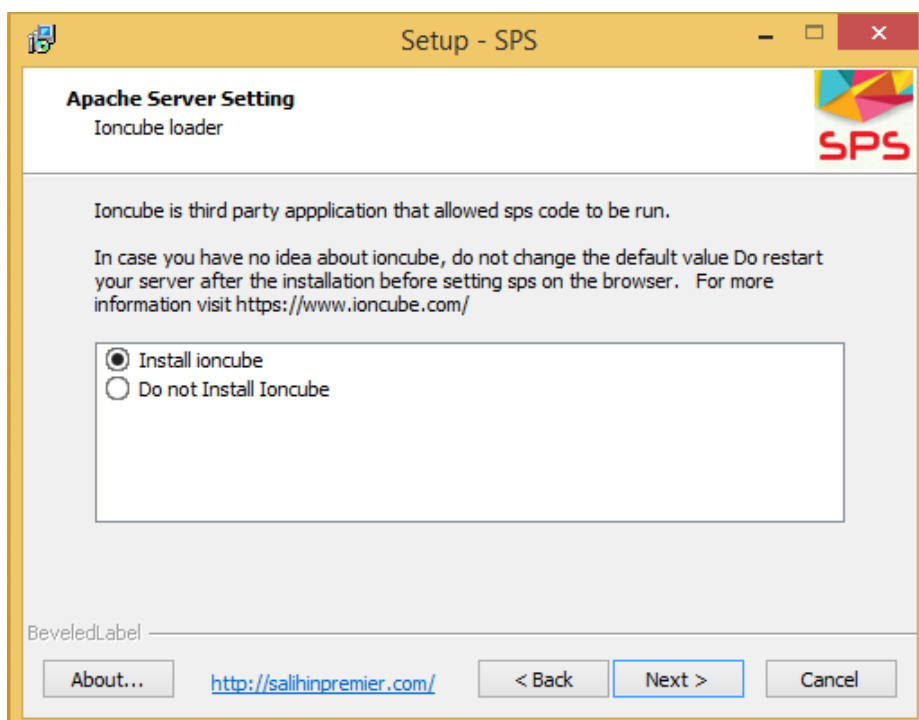

## STEPS TO INSTALL SPS

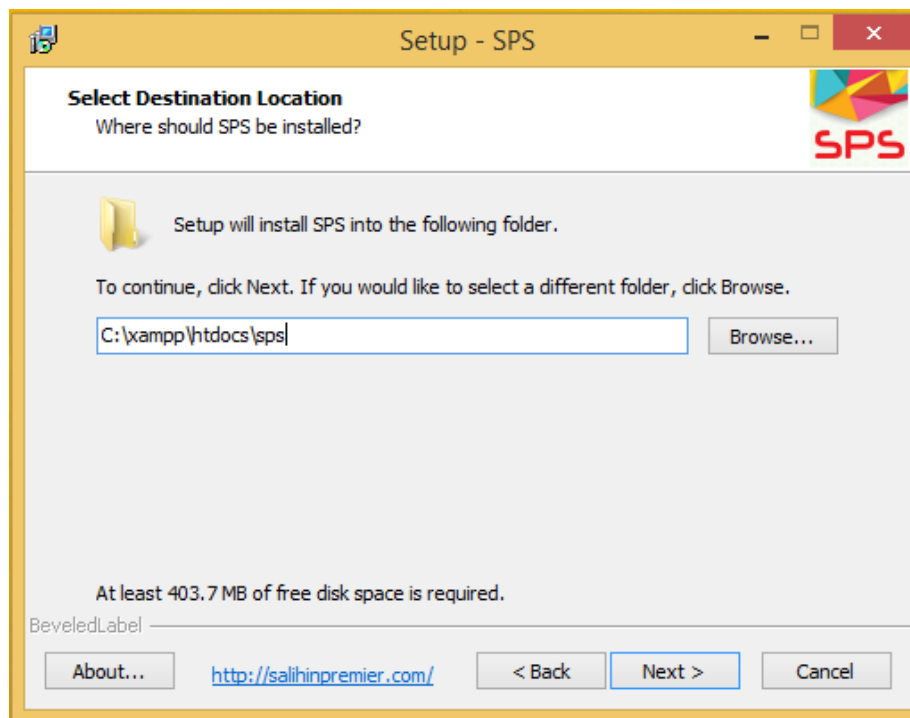

**STEP 1:** Welcome to the SPS Setup Wizard. This installer will install the SPS Version 14.01 on your computer. It is recommended that you close all the other applications before continuing. Click Next to continue, or Cancel to exit the installation setup.

**STEP 2:** Please make sure the XAMPP is installed or your web server is functioning. In case you already have xampp, click Next to continue, otherwise click on Install Xampp then wait until xampp installation is complete.

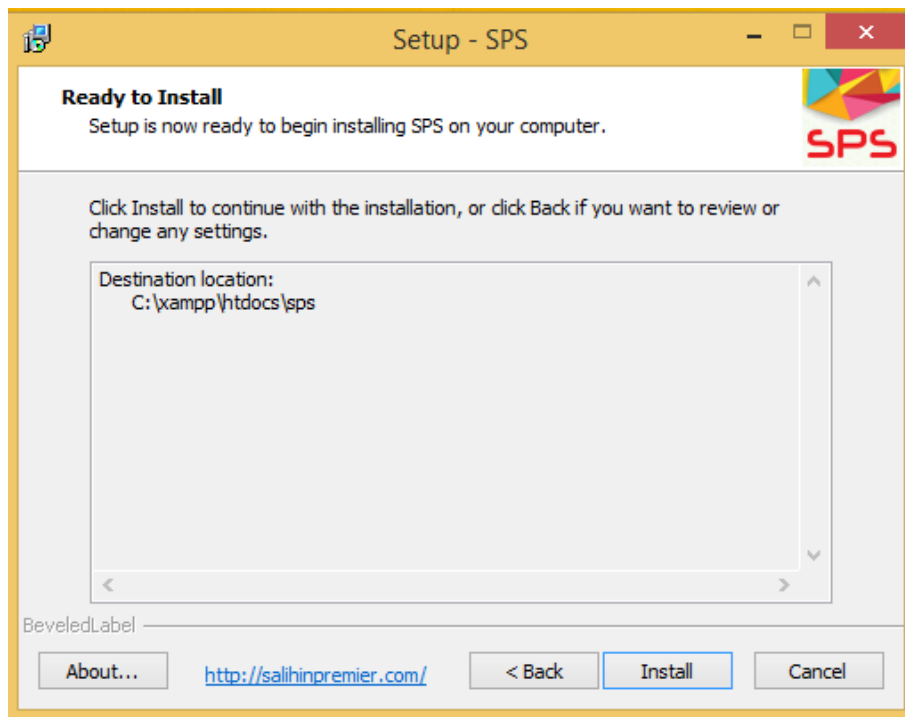

**STEP 3:** Please make sure you install ioncube. Click Next button.

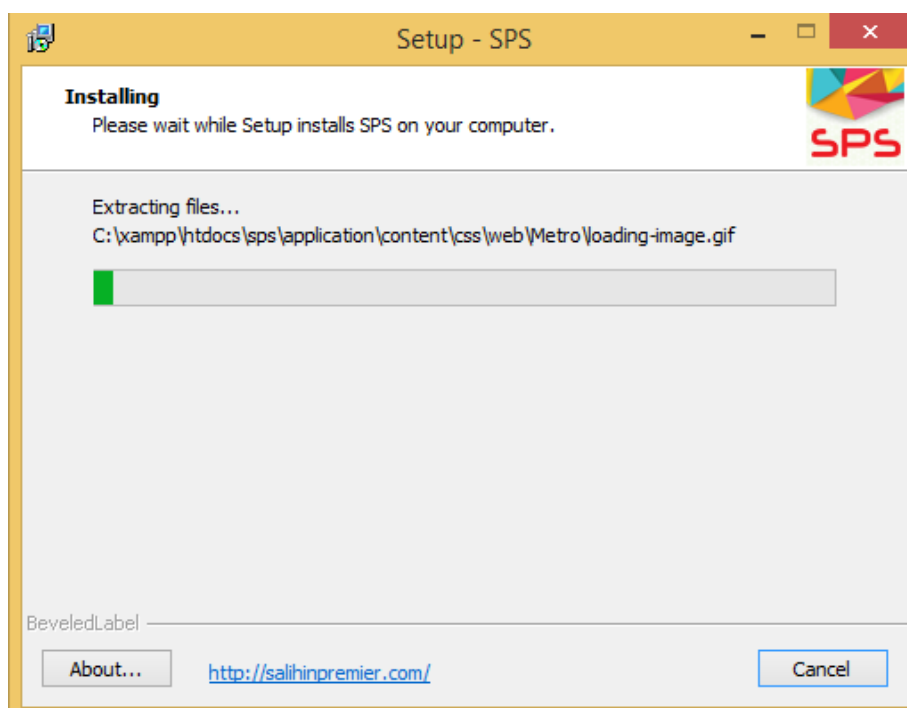

**STEP 4:** Before you continue, please select the destination which must be the web document root of your server (htdocs for xampp), stored folder location.

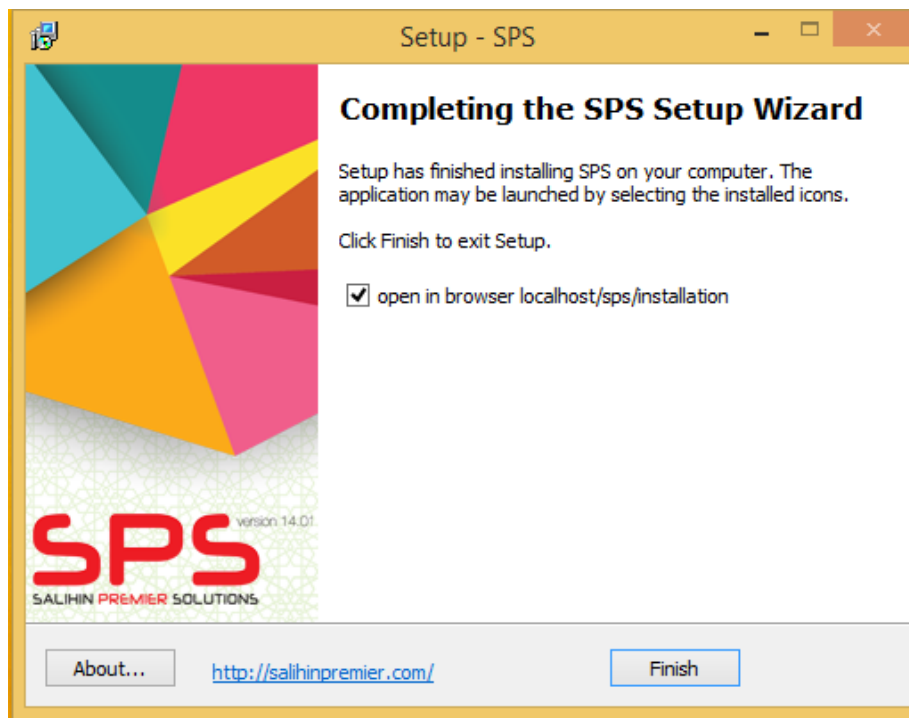

To continue, click Next. If you would rename the folder name, then click Browse.

**STEP 5:** Click Install to continue with the installation, or click Back if you want to review or change any settings.

**STEP 6:** Please wait while Setup installs SPS on your computer.

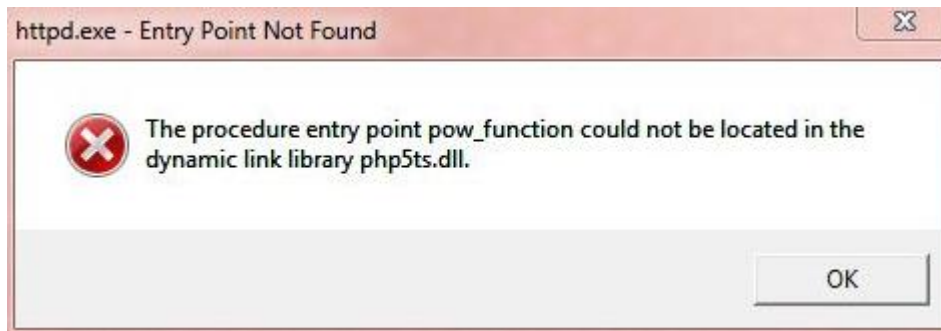

**STEP 7:** Congratulation! Setup has finished installing SPS on your computer. Please make sure that you RESTART your XAMPP before you tick the open in browser localhost/sps/installation option. Click Finish to exit Setup.

#### **NOTE**

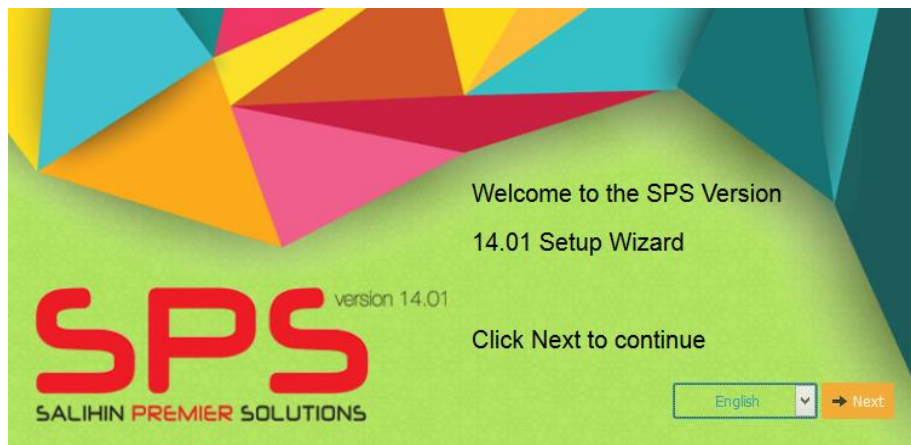

- If you have renamed the sps folder, once the browser opens, replace “sps” with the name you have used previously.
- In case you encounter the following error, do restart your server then refresh your browser.

Site error: the file C:\xampp\htdocs\sps\application\controllers\installation.php requires the ionCube PHP Loader ioncube\_loader\_win\_5.6.dll to be installed by the website operator. If you are the website operator please use the ionCube Loader Wizard to assist with installation.

The following warning message **may** occur due to minor version conflict. Just click ok to continue.

**STEP 8:** Type localhost/sps/installation. You will see the Welcome to the SPS Version 14.01 Setup Wizard. Click Next to continue.

**NOTE :** If you have renamed the sps folder, once the browser opens, replace “sps” with the name you have used previously.

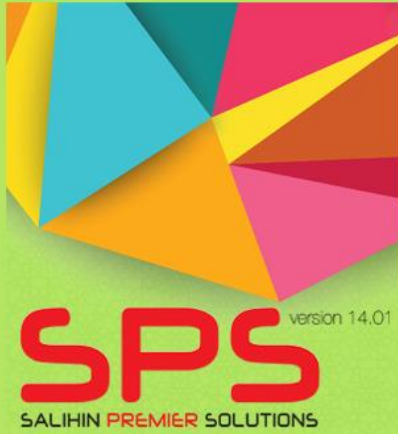

**STEP 9:** To continue, you have to accept the software license agreement by clicking the box. If you do not agree with the license agreement, the Next button will be disabled.

**STEP 10:** Click on Login to get your license (open in a browser [demo.salihinpremier.com/ss-ss/customerlogin](http://demo.salihinpremier.com/ss-ss/customerlogin)). You need to enter your Serial No. located at your SPS Pack. Copy and paste the User Registration Code and Activation Code. Click Validate button. (Please refer to Appendix 1)

**Note:** Make sure there is no SPACE when you copy and paste. IF it fails to validate, please contact your Dealer.

|                                                         |                        |
|---------------------------------------------------------|------------------------|
| Database Host                                           | localhost              |
| Database Name                                           | sps1401                |
| Database User Name                                      | root                   |
| Database User Password                                  | Database User Password |
| <input checked="" type="checkbox"/> Auto configure      |                        |
| <a href="#">&lt; Previous</a> <a href="#">Next &gt;</a> |                        |

**STEP 11:** After successful activation, you have to setup your database. Please make sure that your Database Host, Database Name and Username are correct.

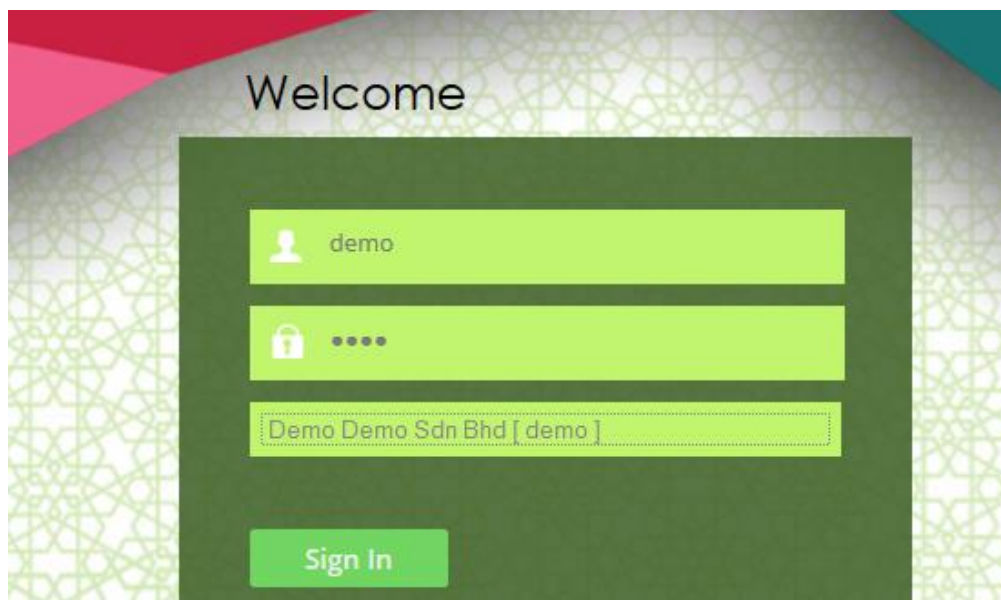

**Note:**

- If you want to change the database setting, click the Auto configure box.
- If you are setup sharing networking of SPS, please make sure you enter the IP Number of your main server. Otherwise you can use as **localhost**.
- You are encouraged not to rename Database Name.
- Enter your Database User Name. (By default is **root**).
- Enter your Database User Password. (By default, there is no password).
- Click Next to continue.

| Pre-Installation Check                                          |     |
|-----------------------------------------------------------------|-----|
| PHP Version >= 5.5.11                                           | Yes |
| Apache Version >= 2.4.9                                         | Yes |
| Mysql Version >= 5.6.16                                         | Yes |
| Recommended settings                                            |     |
| Use of Xampp veersion >=8.3.3                                   | -   |
| PHP Version >= 5.3.10                                           | -   |
| <a href="#">&lt; Previous</a> <a href="#">✔ Confirm Install</a> |     |

**STEP 12:** Check the Pre-Installation. Click Confirm Install button to continue.

**STEP 13:** Once finished, you will see this interface. Here, you will enter the following details:

Username : demo

Password : demo

Company : Demo Demo Sdn Bhd [demo]

After Signing In, you are already in the main page of SPS Accounting Interface. Refer to the internal user guide on how to use SPS to manage your business.

#### **Appendix 1: How to get customer installation details**

- Open in a browser [demo.salihinpremier.com/ss-ss/customerlogin](http://demo.salihinpremier.com/ss-ss/customerlogin)
- Enter the username and password to login.
- Click the SPS Serial No. link. Then you will be directed to License page.
- Enter the Installation Code and click the Update button.
- Once updated, the system will generate the Activation Code.

**Note:** Make sure that there is no SPACE when pasting into the installation field.

| SPS License                                                                                              |              |                  |                         |                          |
